

SIDDHARTH YADAV

Full Stack Developer | MERN Stack | Java | SDE-I

☎ +916393380272 ✉ hydrasiddhu213@gmail.com 📧 siddharthaarao 📧 si12ssdd 📍 Prayagraj, India

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and B.Tech Computer Science graduate (2026) with hands-on experience designing and deploying 3 production-grade MERN stack applications. Proficient in RESTful API development, JWT and OAuth 2.0 authentication, Razorpay payment integration, and scalable React.js with Redux Toolkit frontends. Solid foundation in Java, Data Structures and Algorithms, and Object-Oriented Programming. Seeking a Full Stack Developer or Software Development Engineer role (SDE-I) at a growth-oriented organization.

EDUCATIONS

Lovely Professional University | Punjab
Bachelor of Technology in Computer Science and Engineering

Aug 2022 - May 2026
CGPA : 6.86 out of 10

- Intermediate: **76.8%**
- Matriculation: **85.4%**

PROJECTS

AI Text-to-Image Generator | 📄 Github 🌐 Website
Developer

Jul 2025 - Present

- Developed a production-ready **MERN** application that integrates a third-party **AI image API**, efficiently processing over **100** concurrent asynchronous requests.
- Implemented **Razorpay** for credit-based monetization, incorporating real-time **MongoDB** balance tracking to facilitate seamless in-app purchases.
- Secured over **10 REST API** endpoints using **JWT** and **RBAC**, achieving zero unauthorized access incidents in production.
- Deployed a fully responsive **React.js** and **Tailwind CSS** user interface via a **CI/CD** pipeline on **Vercel**, maintaining **99%** uptime across all devices.

Technologies / Tools Used : React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, REST API

Affiliate Link Analytics Platform | 📄 Github 🌐 Website
Developer

Jun 2025 - Present

- Developed a multi-role SaaS platform with real-time click & conversion analytics dashboards using Chart.js, supporting 2 user roles with granular access controls and tiered subscription plans.
- Integrated Google OAuth 2.0, JWT, Nodemailer, and Razorpay webhooks for secure user onboarding, email automation, and payment verification.
- Managed global state with Redux Toolkit across 15+ components, reducing prop-drilling by 40% and enabling scalable feature expansion.

Technologies / Tools Used : React.js, Redux Toolkit, Node.js, MongoDB, Chart.js, OAuth 2.0

Role-Based Task Management System | 📄 Github 🌐 Website
Developer

Feb 2025 - Present

- Built a responsive SPA with two role-specific dashboards (Admin & Employee), supporting 5 task workflows including assignment, priority tagging, and real-time status tracking.
- Implemented browser-side task persistence for zero-backend session continuity, reducing task management overhead for 2 user roles.
- Designed a modular component architecture using Context API, enabling state sharing across 10+ components without external libraries.

Technologies / Tools Used : React.js, Context API, Tailwind CSS, JavaScript

SKILLS

Databases :	MongoDB, MySQL, Mongoose ODM
Frameworks & Libraries :	React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
Programming Languages :	Java, JavaScript (ES6+), TypeScript, Python
Soft Skills :	Communication, Decision Making, Problem Solving, Leadership
Tools & Platforms :	Node.js, Express.js, Git, GitHub, Docker, Linux, Vercel, Render, Razorpay, Chart.js, Nodemailer, Postman, VS Code

CERTIFICATIONS

- Cloud Computing – Coursera
- MongoDB for Developers – Coursera (Google)
- Data Structures & Algorithms – GeeksforGeeks
- Industry 4.0 & IIoT – NPTEL
